

Doha Nam

Ph.D. Student in Computer Science | University of Illinois Urbana-Champaign (UIUC)

dohanam2@illinois.edu | waroad.github.io | Google Scholar

RESEARCH INTERESTS

Software Engineering (SE) and Artificial Intelligence (AI), with a particular focus on:

- **LLM-based Autonomous Software Agents:** Developing reliable agentic workflows, interactive developer environments, and robust evaluation harnesses/benchmarks for end-to-end software automation.
- **Code Intelligence & Foundation Models:** Investigating how Large Language Models represent and reason over complex code dynamics, code modifications, and change semantics.
- **Automated Software Quality & Security:** Applying AI and agentic systems to automated vulnerability detection, defect prediction, software testing, and program repair.

EDUCATION

University of Illinois Urbana-Champaign (UIUC)

Ph.D. Student in Computer Science

Urbana, IL, USA

Aug. 2026 – Present

- Co-advised by Prof. [Yiling Lou](#) and Prof. [Lingming Zhang](#)

Korea Advanced Institute of Science and Technology (KAIST)

M.S. in Computer Science

Daejeon, South Korea

Mar. 2024 – Feb. 2026

- Advisor: Prof. Jongmoon Baik

Kyungpook National University

B.S. in Computer Science and Engineering

Daegu, South Korea

Mar. 2018 – Feb. 2024

PUBLICATIONS

[FSE 2026] Doha Nam, Taehyoun Kim, Duksan Ryu, and Jongmoon Baik.

“ReDef: Do Code Language Models Truly Understand Code Changes for Just-in-Time Software Defect Prediction?”

ACM International Conference on the Foundations of Software Engineering (FSE 2026), 2026.

[ASE 2025] Doha Nam and Jongmoon Baik.

“LOSVER: Line-Level Modifiability Signal-Guided Vulnerability Detection and Classification”

IEEE/ACM International Conference on Automated Software Engineering (ASE 2025), 2025.

🏆 **ACM SIGSOFT Distinguished Paper Award**

AWARDS & HONORS

- **Outstanding M.S. Thesis Award**, Korea Advanced Institute of Science and Technology (KAIST) *Feb. 2026*
- **ACM SIGSOFT Distinguished Paper Award**, IEEE/ACM ASE 2025 *Nov. 2025*
